

Candidate Presentation: Manitoba Research Chair in Health System Innovation at the University of Manitoba

“DATA DRIVEN INNOVATION”

Paul Komenda, MD, FRCPC, MHA, CHE

is an Associate Professor, Nephrology, Faculty of Medicine, University of Manitoba; Medical Director, Home Hemodialysis Program & Director of Research, Seven Oaks General Hospital.

In addition to Clinical Nephrology training, he has completed a Masters in Health Administration at the Sauder School of Business in addition to a research fellowship at the University of British Columbia. He currently holds provincial and national grant funding in excess of 2 million dollars.

Thursday, March 6, 2014

12:00 noon - 1:00 p.m.

Theatre C, Basic Medical Sciences Bldg.

730 William Avenue

Data driven, industry leading Health System Innovation transcends the leveraging of traditional sources of data evidence based medicine and hierarchical health care models. The modern interprofessional team of innovators includes not only clinicians, but engineers, programmers, project managers, qualitative researchers and data science personnel. This talk will provide a high level five year plan to structure a Centre of Healthcare Innovation nimble enough to guide useful, practical cycles of meaningful system change across a diverse healthcare continuum.
